Sciences**

Seminar on Sustainability

“Save Earth Save Ourselves....”

“Reduce, Recycle and Reuse”

A pair of hands is shown from the bottom, cupping a small globe of the Earth. The globe is blue and white, showing continents and oceans. Overlaid on the globe is a blue outline of a house, with a triangle for the roof and a rectangle for the base. The text 'SAVE PLANET' is at the top, 'REDUCE RECYCLE REUSE' is in the center, and 'SAVE OURSELVES' is at the bottom.

SAVE PLANET

REDUCE

RECYCLE

REUSE

SAVE OURSELVES

A pair of hands is shown from the bottom, cupping a small, realistic-looking globe of the Earth. The globe is blue and white, showing continents and oceans. The hands are light-skinned and positioned to support the globe from below. The background is dark, making the hands and globe stand out.

Ensuring a sustainable economy
and environment

Environment

- **Environment is surrounding atmosphere/ condition for existence”**
- **"Environment is an essential natural process or an outcome of occurrence" –
"Environment is of two types, one is negative and the other is positive“**
- **Environment motivates to react**
- **We also generate/alter environment in our surroundings by our practice**

Reduce

- We should try to minimize the use of goods and products which are harmful for the environment and thereby human life.

Recycle

Today's Scrap Recycling Industry

- Recycling is the best way to solve solid waste
- Recycling system differs from developing countries and developed countries.
- Ensuring a sustainable economy and environment
- 40% of the world's raw material needs come from scrap recycling
- Recycling reduces the energy and resources needed to produce new products
- Reduce greenhouse gas emissions

Recycle

- Helps protect the earth's environment
- Helps save energy that can be used for more important purposes

➤ Without scrap recycling...

- More pollution & climate change
- Rise in energy use & more expensive fuel prices
- Depleting our natural resources
- Greater need for landfills and negative impacts on air quality & green spaces

Scrap Recycling

- Scrap recycling industry is uniquely positioned to meet the challenges of today's world
- Scrap recyclers are the “Original Recyclers”
- World's largest & oldest environmental industry
- Economic leader, job creator, and major exporter

Scrap Recycling

- Real, sustainable solutions for balancing economic growth and environmental stewardship.
- Working daily to make even greater contributions to our nation's and the world's environmental and economic sustainability

We need to do it for one very simple reason...

**OUR CHILDREN'S FUTURE
DEPENDS ON IT!**

**THANK
YOU**
